

1. (This problem is worth 3 points each part, 12 points total.)

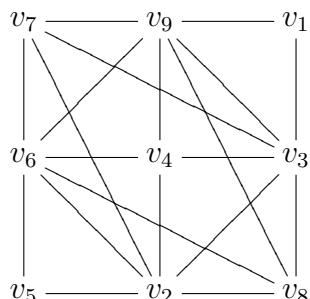

- (a) The graph  $K_{2,20}$  is planar. Find the number of regions.
- (b) Prove there is no perfect matching using Hall's theorem.

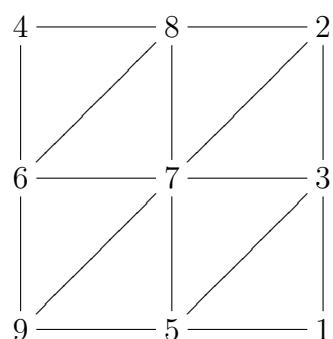

- (c) Compute the chromatic number  $\chi(G)$ .

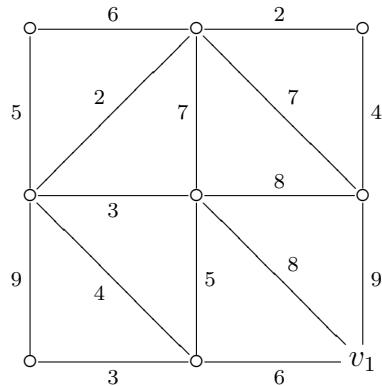

- (d) Color the graph using Sequential Coloring algorithm.

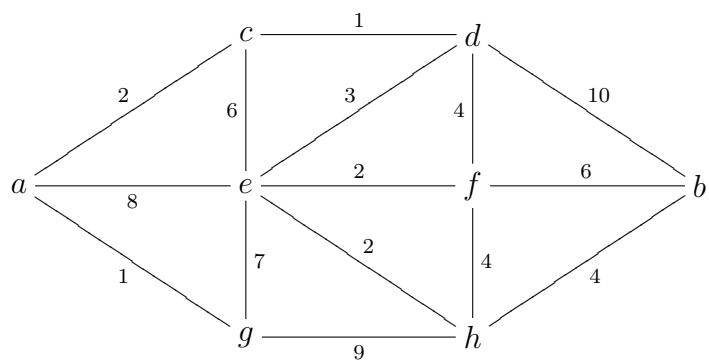

2. (4 points) Draw the rooted spanning tree using Breadth-First Search starting at vertex number 1.

3. (4 points) Draw the minimal spanning tree using Prim's algorithm starting at  $v_1$ .

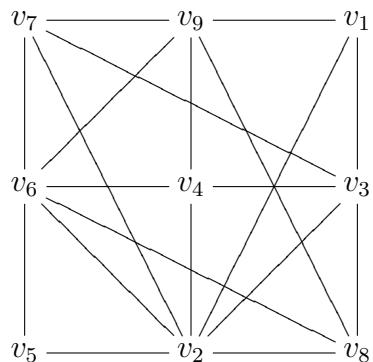

4. (4 points) Use Dijkstra's algorithm to compute  $d(a, b)$ .

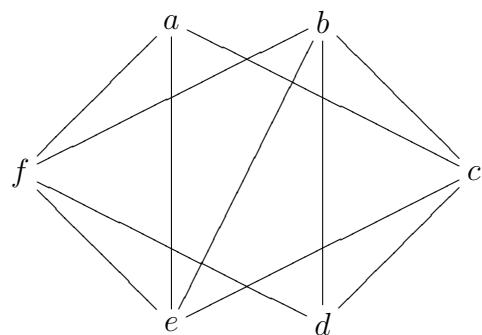

5. (4 points) Prove that  $\overline{P_{10}}$  is not planar using Euler's test.

6. (6 points) Color the graph using Welsh-Powell algorithm.

7. (6 points) Determine planar or not planar using Hamilton cycle.
