

Linear Algebra

Exam I

7-4-2004

Dr. Sabah Ahmad

Dr. Amin Witno

1. Solve the following system of linear equations.

$$\begin{aligned} a + 5b + 4c + 3d + 5e &= -1 \\ b + c + 2d + 3e &= 1 \\ d + 4e &= 2 \end{aligned}$$

2. Find the inverse of A if it exists.

$$\begin{matrix} 2 & 5 & 3 \\ 1 & 2 & 3 \\ 1 & 0 & 8 \end{matrix}$$

3. Prove without evaluating the determinant:

$$\begin{matrix} b+c & a+c & a+b \\ 2 & 2 & 2 \\ a & b & c \end{matrix} = 0$$
